Usermod

```
ikamalisakthivel@cloudshell:~$ usermod
Usage: usermod [options] LOGIN

Options:
  -a, --append                append the user to the supplemental GROUPS
                              mentioned by the -G option without removing
                              the user from other groups
  -b, --badname               allow bad names
  -c, --comment COMMENT      new value of the GECOS field
  -d, --home HOME_DIR        new home directory for the user account
  -e, --expiredate EXPIRE_DATE set account expiration date to EXPIRE_DATE
  -f, --inactive INACTIVE    set password inactive after expiration
                              to INACTIVE
  -g, --gid GROUP             force use GROUP as new primary group
  -G, --groups GROUPS        new list of supplementary GROUPS
  -h, --help                  display this help message and exit
  -l, --login NEW_LOGIN      new value of the login name
  -L, --lock                  lock the user account
  -m, --move-home             move contents of the home directory to the
                              new location (use only with -d)
  -o, --non-unique            allow using duplicate (non-unique) UID
  -p, --password PASSWORD     use encrypted password for the new password
  -P, --prefix PREFIX_DIR    prefix directory where are located the /etc/* files
  -r, --remove                remove the user from only the supplemental GROUPS
                              mentioned by the -G option without removing
                              the user from other groups
  -R, --root CHROOT_DIR      directory to chroot into
  -s, --shell SHELL          new login shell for the user account
  -u, --uid UID               new UID for the user account
  -U, --unlock                unlock the user account
  -v, --add-subuids FIRST-LAST add range of subordinate uids
  -V, --del-subuids FIRST-LAST remove range of subordinate uids
  -w, --add-subgids FIRST-LAST add range of subordinate gids
  -W, --del-subgids FIRST-LAST remove range of subordinate gids
  -Z, --selinux-user SEUSER  new SELinux user mapping for the user account
```

Zip

```
ikamalisakthivel@cloudshell:~$ zip  
Copyright (c) 1990-2008 Info-ZIP - Type 'zip "-L"' for software license.  
Zip 3.0 (July 5th 2008). Usage:  
zip [-options] [-b path] [-t mmdyyy] [-n suffixes] [zipfile list] [-xi list]  
The default action is to add or replace zipfile entries from list, which  
can include the special name - to compress standard input.  
If zipfile and list are omitted, zip compresses stdin to stdout.  
-f freshen: only changed files -u update: only changed or new files  
-d delete entries in zipfile -m move into zipfile (delete OS files)  
-r recurse into directories -j junk (don't record) directory names  
-0 store only -l convert LF to CR LF (-ll CR LF to LF)  
-1 compress faster -9 compress better  
-q quiet operation -v verbose operation/print version info  
-c add one-line comments -z add zipfile comment  
-@ read names from stdin -o make zipfile as old as latest entry  
-x exclude the following names -i include only the following names  
-F fix zipfile (-FF try harder) -D do not add directory entries  
-A adjust self-extracting exe -J junk zipfile prefix (unzipsfx)  
-T test zipfile integrity -X eXclude eXtra file attributes  
-y store symbolic links as the link instead of the referenced file  
-e encrypt -n don't compress these suffixes  
-h2 show more help
```

```
ikamalisakthivel@cloudshell:~$ zip archive.zip demo.txt  
adding: demo.txt (deflated 12%)
```

Unzip

```
ikamalisakthivel@cloudshell:~$ unzip archive.zip
